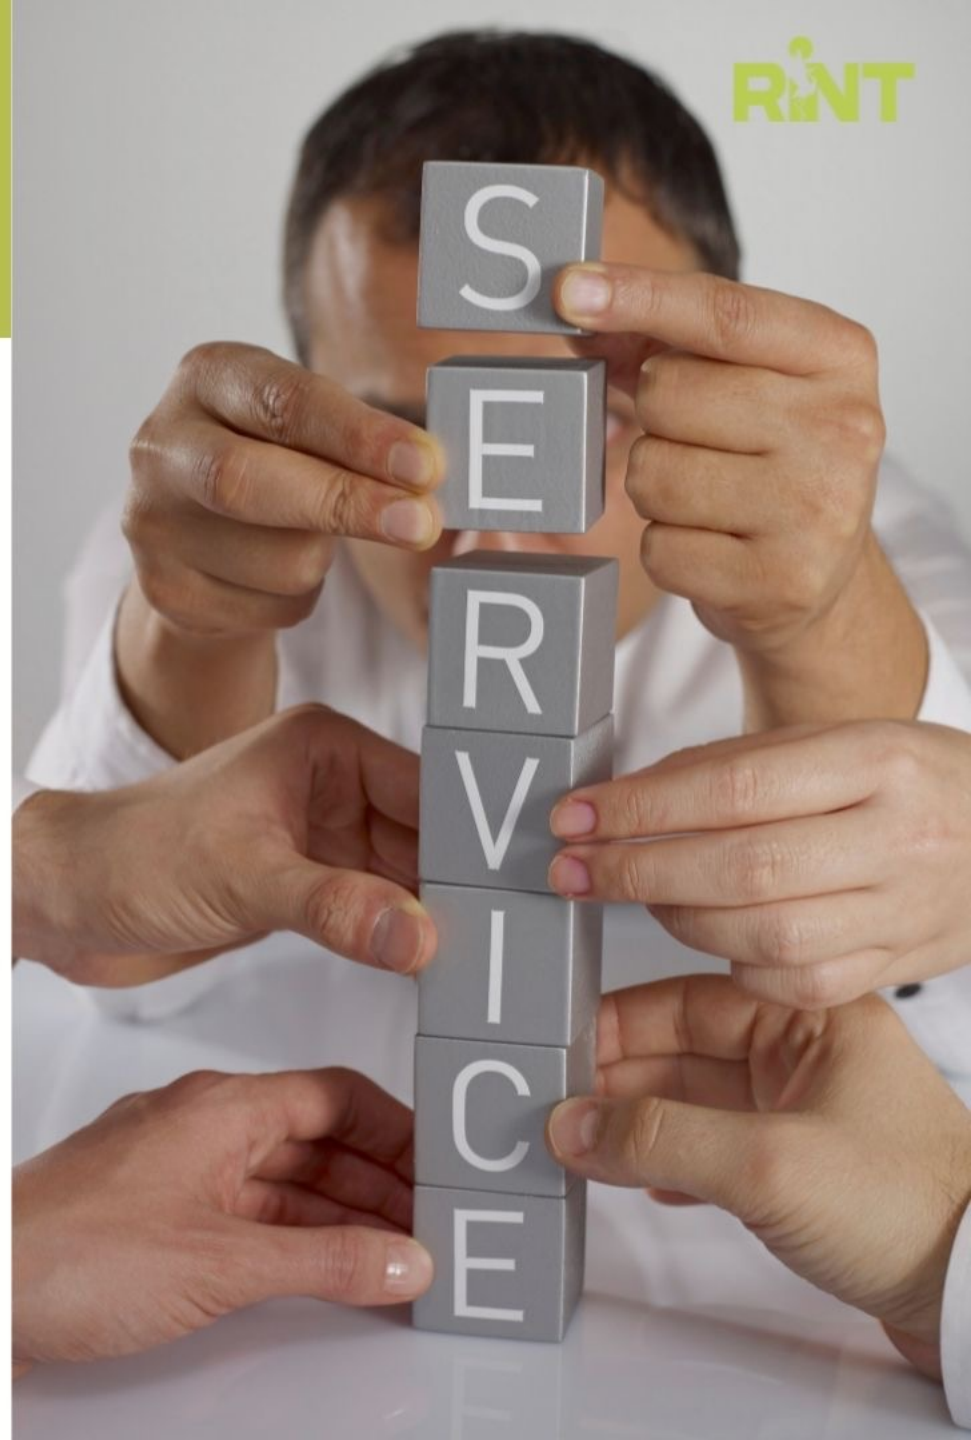
- Professional Services



Cloud Computing

What Benefits Do Rint's Managed Cloud Solutions Bring to You?

Rint managed cloud solutions; internal optimize the productivity of IT staff to employees within the institution and encourage you to participate in the innovations of work to achieve innovative solutions to reduce infrastructure costs and the duration of the potential delay that may occur at the same time, adapt quickly to changes, and to establish a system to provide predictable infrastructure needs and issues that may arise.

Rint's knowledge can readily handle difficulties like migration, configuration, optimization, stress, higher expenses, and the time it takes to deal with them.

Our Cloud Solutions

We support your long-term business growth by solving complex IT challenges with our private, public and hybrid cloud solutions.

Public Cloud

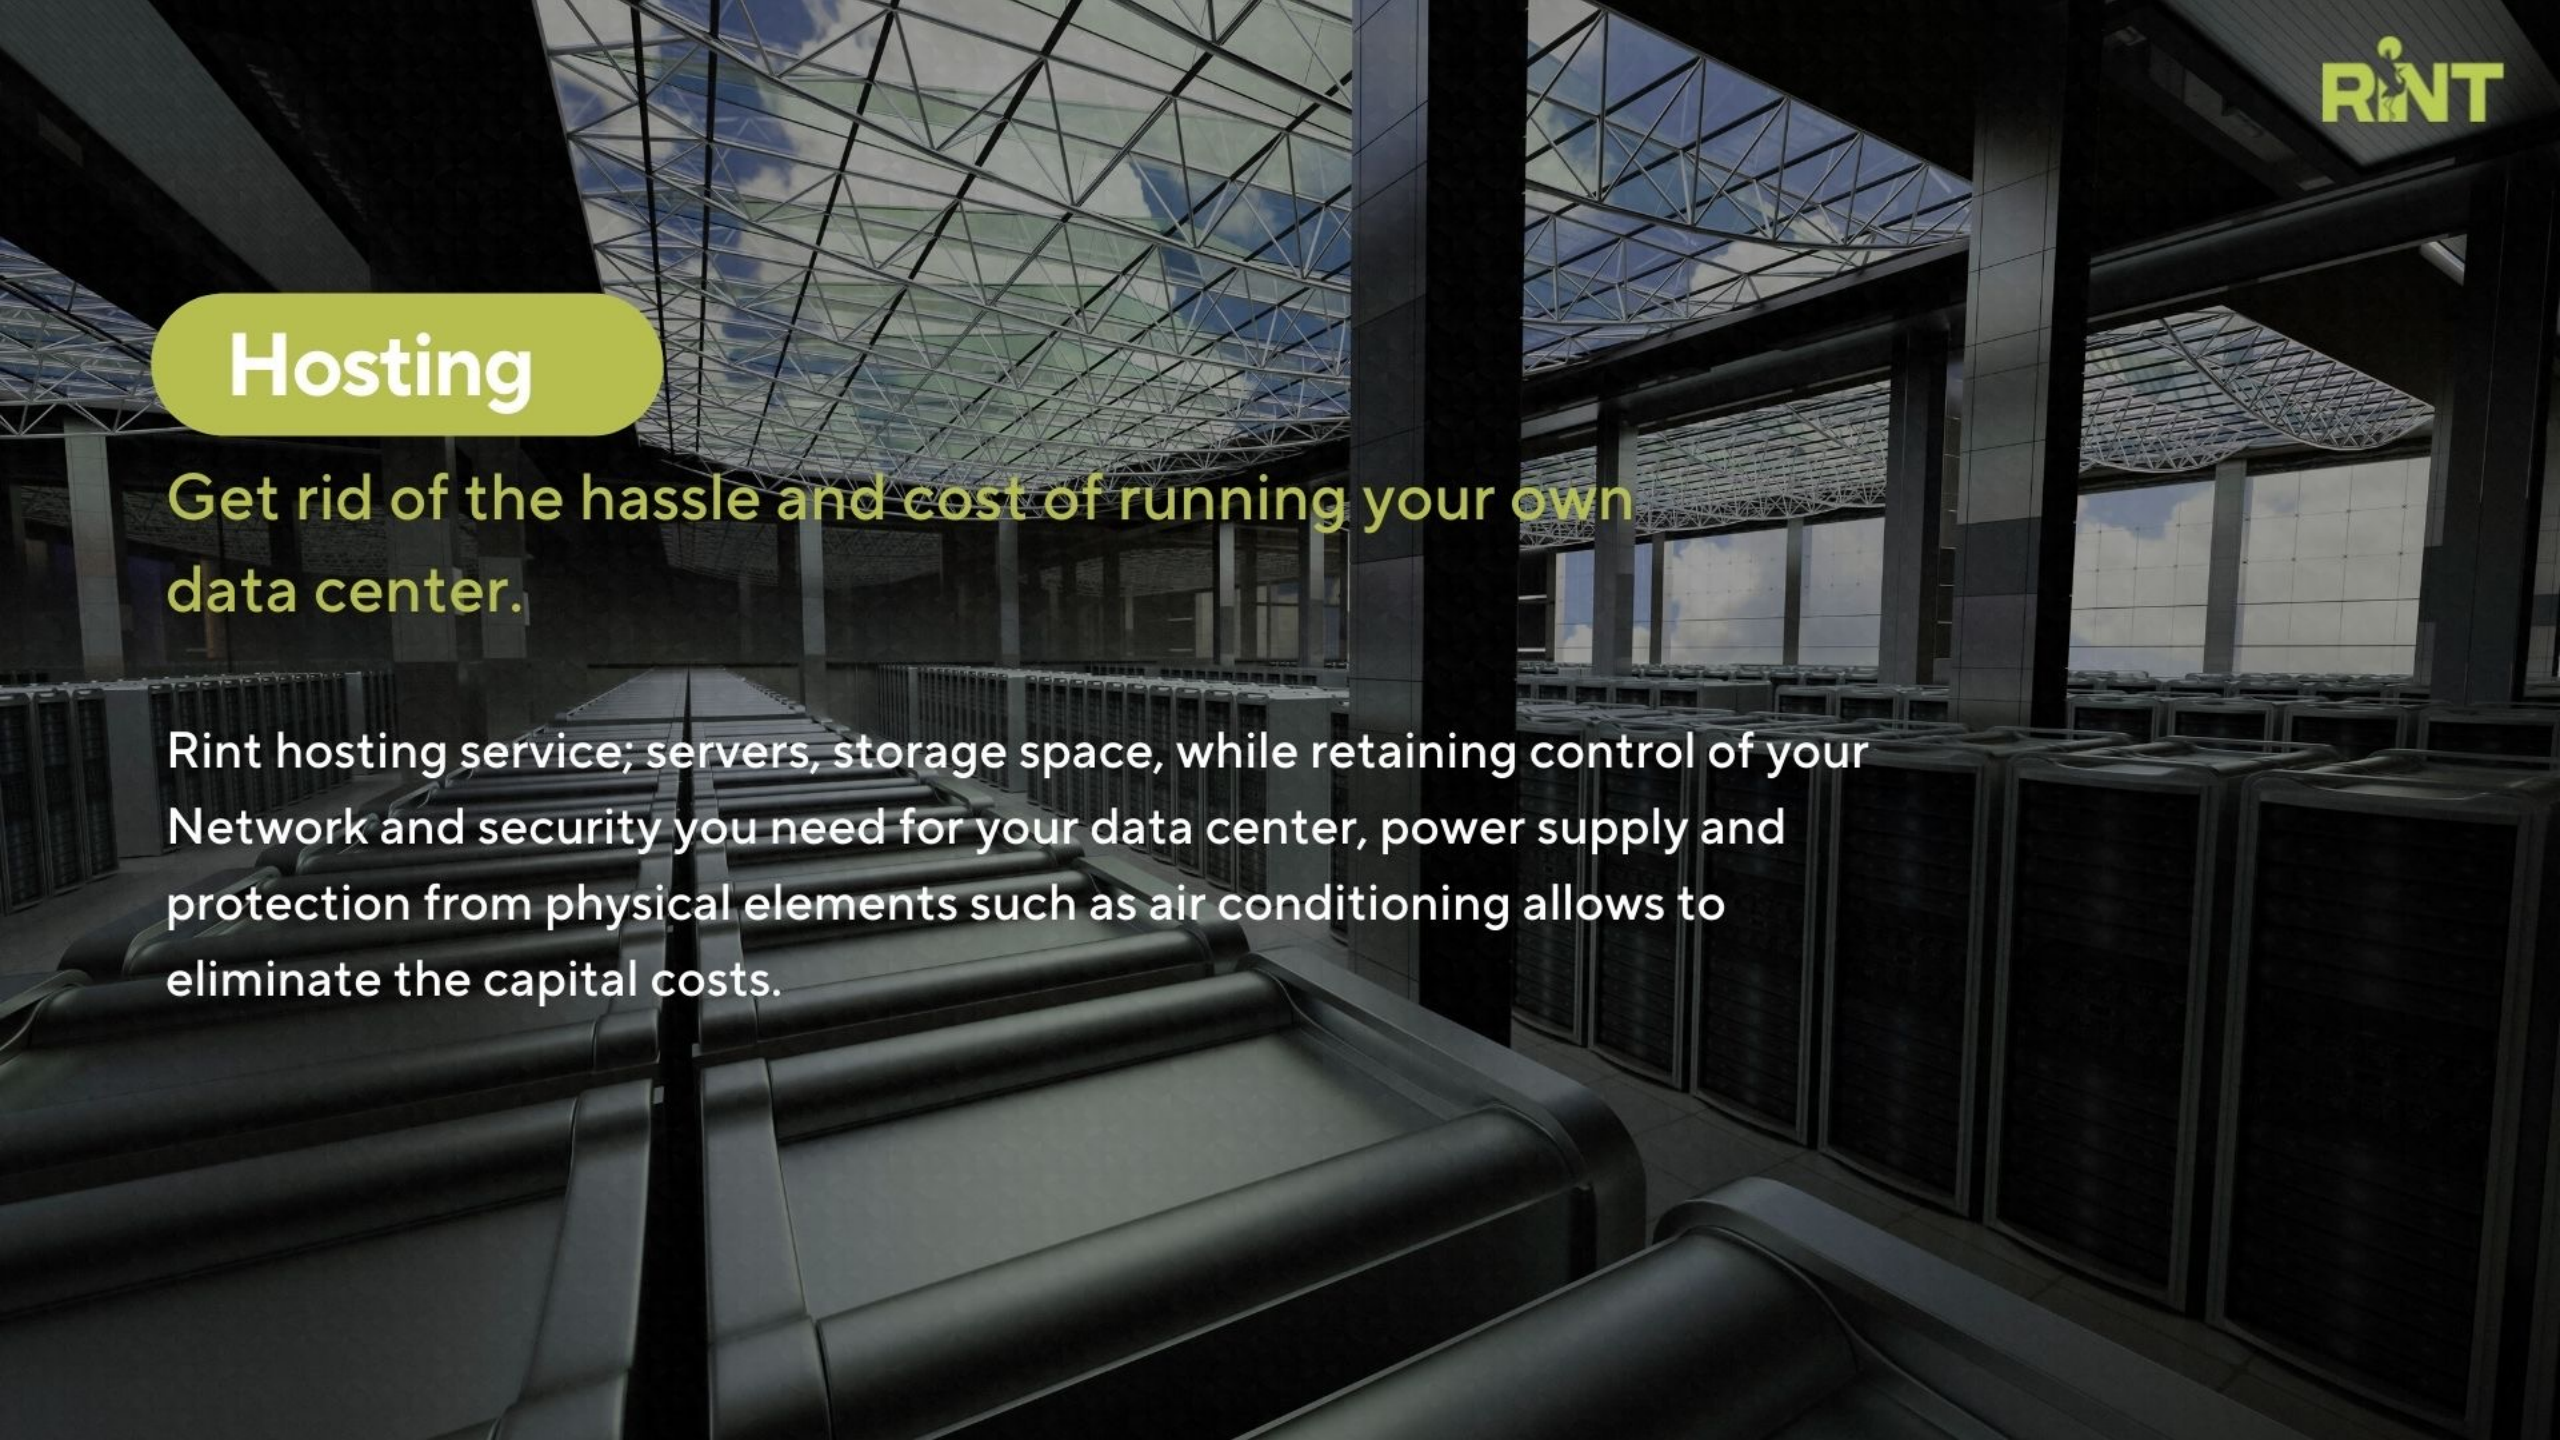
Rint provides you with scalable and flexible public cloud solutions to support your digital transformation. We are with you at every moment of the stage of determining the right strategies for cost management, technical support, infrastructure and optimization of your organization, acting with the responsibility of ensuring the infrastructure security of your applications and data in the transition to the public cloud platform.

Private Cloud

Rint's private cloud solution for transferring your applications and data to the private cloud provides a level of security and flexibility that you cannot achieve with your on-premises IT infrastructure. If you need a platform or an environment of your own that provides high availability and accessibility for your financial data or e-commerce site, Rint will provide you with 24/7 support 365 days a year in line with your business goals with its expert team. Providing the same benefits as the public cloud solution, Rint's private cloud provides a fully customizable environment with the lowest possible latency, high performance and security level.

Hybrid Cloud

Our team will provide you with the most appropriate infrastructure service for your hybrid IT platform. In this way, you can move and scale your traffic-intensive applications to the public cloud. You can keep important applications with high security in your private cloud within the hybrid cloud system. At the same time, in order to ensure the security of data in your hybrid cloud and to optimize it, our experts focus on managing your applications by freeing you from complex processes.



Hosting

Get rid of the hassle and cost of running your own data center.

Rint hosting service; servers, storage space, while retaining control of your Network and security you need for your data center, power supply and protection from physical elements such as air conditioning allows to eliminate the capital costs.

Disaster Recovery

We provide fast recovery of your data, databases, applications and virtual machines in times of disaster.

We design and provide disaster recovery solutions according to your business continuity needs.

Managed Services

Take advantage of our flexible managed services to avoid risks, reduce your costs, and set yourself a predictable path while focusing on your core business activities and return on investment.

Our expert technical team supports your cloud platform by following the emerging developments and new technologies related to the cloud. It also develops a wide range of solution suggestions for you on everything from the security of your business applications to architectural design and distribution. You can minimize the waits and time losses by contacting our certified expert team who knows your business, your goals you want to achieve and your working environment directly. Our technical team will be available 24/7/365 to support your operations and provide you with support on everything you have in mind.

Professional Services

Wherever you are in your IT journey and wherever your data is located, we know what to do next to help you achieve your goal and move forward with the right steps.

Take advantage of our infrastructure services, from applications to networks and security, so that your IT team can focus on core business initiatives and have time to develop innovation-oriented projects. Our architects and engineers work in collaboration with your IT team as a reliable partner to solve complex problems, identify your IT needs, and design solutions that best fit your business needs with efficient and scalable analysis.

Connection

Reliable connectivity is more important than ever for modern businesses. Data volumes are growing exponentially, and organizations need networks that can keep up with this growth. Rint's connectivity solutions provide fast, flexible and secure access to your infrastructure, content and applications.

We offer an on-demand and fully managed connectivity service that enables connectivity globally, regionally, and locally across offices, data centers, remote locations, and the cloud. Our global, cloud-based infrastructure provides connectivity and security services from all over the world.

Rint provides flexible and dedicated connectivity to our fully managed global multi-cloud network. Our team of professionals designs high-performance, scalable, and secure multi-cloud service solutions for Microsoft Azure, IBM, and more.
